✓ Experiment_04

```
from pathlib import Path

files = [f for f in Path('.').iterdir() if f.is_file()]

print("Files in the current directory:")
for file in files:
    print(file.name)

# '''
# The above script uses os module to perform the required function.
# Utilize the pathlib module to perform the same functionality.
# '''
```

 Files in the current directory:
